

THE HOLLOW CROSS

A critical review on religions and churches

(appearing March 2007)

The Hollow Cross Book is an ally of *The Hollow Cross Collection*.

NEW POLICY

In early 2008 we decided to change the policy concerning some of our activities.

The Hollow Cross – as a book – had never been a commercial project, and with a rather costly self-publishing issue lacking the support of retail sales, we had ventured a very limited edition.

We feel that spreading our views and the related facts is more helpful to the objectives of ART & REASON than occasional sales.

Therefore, we now make the complete contents of the book *The Hollow Cross* available FREE as a PDF document, including the book's loose post-print add-on, and we will be pleased to read comments from international readers, if they care to drop us a line.

You will change your mind or feel confirmed in your opinion, but what you get in addition is compelling evidence for overdue drastic changes in modern societies. No one can agree with the contents of this book without an urge to foster improvement. And those who disagree must have very weird reasons of their own.

**IF YOU STILL WANT TO BUY THE ORIGINAL
AT A REDUCED PRICE, LET US KNOW!**

60 pages (plus post-print note) - in a rather entertaining tone - the historic truth and personal conclusions on the role of religions and churches. Some details may surprise and others are likely to shock - they should.

A neatly presented paperback, with attractive miniatures of the paintings in *The Hollow Cross Collection* separating the chapters, the essay in *The Hollow Cross* is for the knowledgeable and the uninformed, and another contribution to atheist thought. But also a challenge for the waverers.

This book is a self-publishing issue that combines the artistic approach with a refreshing prose and overview material with views of famous persons. A rewarding item for your private library.

It is basically not profit-oriented and international distribution may be limited, but as long as available, we send out every single order from Luxembourg.

Read this book!

Do we want to perish for something invented,
for the biggest swindle in the history of humankind?
